SUMMARY

Aspiring Frontend Developer with comprehensive training in HTML, CSS, and JavaScript. Developed dynamic user interfaces during academic projects, harnessing a strong foundation in web development principles. Eager to leverage technical skills in a junior role to enhance user engagement and contribute to innovative web solutions.

PROJECT

Railway Ticket Booking System

github.com/sambhav2512/Railway-ticket-booking-system

- Designed and developed a railway ticket booking system using HTML, CSS, and JavaScript, with Firebase integration for real-time database management and user authentication.
- The system allows users to book, manage, and view ticket details through a responsive web interface.

Movie Search Website

github.com/sambhav2512/movie-search-project

- Developed a movie search website using HTML, CSS, and JavaScript with integrated API calling for dynamic content retrieval.
- The project also features user authentication functionality, including fully responsive login and registration pages .

Templates using HTML , CSS and JavaScript

- Created responsive login and registration page templates, along with a shopping website template, using HTML and Bootstrap for clean design and mobile-friendly layouts.
- Developed a responsive student portal using HTML , CSS , Java Script that allows users to input student details and dynamically displays the data in a structured HTML table.
